

Complete Alliance setup as follows:

Make sure you are connected to the internet.

Start the Virtual Machine as indicated in the Readme file.

Login to the alliance account, also as indicated in the Readme file.

Open a terminal.

Run the following commands on the terminal (during such installations, if asked by a question Y/N, choose Y), such commands might take some time during execution:

- `su` (Then type the password alliance)
- `yum remove audit-2.2.1-2.fc18.i686`
- `yum install gcc`
- `yum install gcc-c++`
- `su alliance`
